SPL PRACTICAL LAB REPORT INSTRUCTIONS

》》 In the report, for each problem, include the following points and must maintain the sequence:

- Experiment No. : (this is actually the Question number)

- Experiment Name : (Here just write the question fully completed sentence)

- Objective: (what the problem is about? What will we try to find? Write within 3/4 sentences)

- Algorithm/ Flowchart: (either write the Algorithm or draw the Flowchart of the respective problem)

- Source Code: (write the full code in C language)

- Output: (take snapshot of the output with white background and black text color, after executing each program. Then print the output and attach it with glue on the respective place)

》》 Everything should be handwritten other than the output and cover page only
》》 must use A4 size paper for the report and keep the report neat and clean
》》 Use only one side of the paper, other side should be empty
》》 Include page number to the upper right corner of each page
》》 maintain proper margin on the pages
》》 Cover page of the report should be color printed
》》 There should be a handwritten INDEX page in tabular format (contains 3 columns: Experiment No., Experiment Name, Page No.)
》》 In the report, at first there will be a Cover Page, then the INDEX page then the pages of the Experiments sequentially.
》》 The final report must have spiral binding
